

```
[root@server01 ~]# ls /opt/software/DBdoctorV3.1.2_20240417V5.tar.gz
安装DBdoctor数据库
数据库下载目录/opt/software/
数据库解压目录/opt/data/
[root@server01 software]# ls
 [root@server01 software]# tar -zxf DBdoctorV3.1.2_20240417V5.tar.gz -C /opt/data/
执行./dbd -I 进行安装
 [root@server01 software]# cd /opt/data/
[root@server01 data]# ls
 [root@server01 data]# cd dbdoctor-3.1.2/
[root@server01 dbdoctor-3.1.2]# ls
          dbd.log host logs proc sbin srv
dev jdk17 media query-instance.sh scripts sys
oin
counter.sh etc
                   lib mnt root service tmp
lib64 opt run sql Unit
                                                            UniteServer.py
[root@server01 dbdoctor-3.1.2]# ./dbd -I
安装报错
 root@server01 dbdoctor-3.1.2]# ./dbd -I
  24-04-23 11:30:38.463419725 [INFO] [dbd]: Command Tool Version 3.1.2.0,Handler Co
 024-04-23 11:30:38.616706774 [INFO] [dbd]: current_path available_space is 92GB,
 s valid, to do next~
查看ulimit
[root@server01 dbdoctor-3.1.2]# ulimit -n
1024
临时调整ulimit 大小
[root@server01 dbdoctor-3.1.2]# ulimit -n 655360
[root@server01 dbdoctor-3.1.2]#
验证
[root@server01 dbdoctor-3.1.2]# ulimit -n
655360
永久生效
[root@server01 dbdoctor-3.1.2]# vi /etc/security/limits.conf
添加如下内容
  soft nofile 655360
  hard nofile 655360
  soft nproc 655360
  hard nproc 655360
再次执行安装
 root@server01 dbdoctor-3.1.2]# ./dbd -I
2024-04-23 11:40:00.625165898 [INFO] [dbd]: Command Tool Version 3.1.2.0,Handler Command:
 024-04-23 11:40:00.678480711 [INFO] [dbd]: current_path available_space is 92GB, is valid
```

一些警告信息

KAFKA_CONTROLLER_PORT port: 19093
MYSQL_NODE_PORT port: 3306
creating agent package, wait a moment.

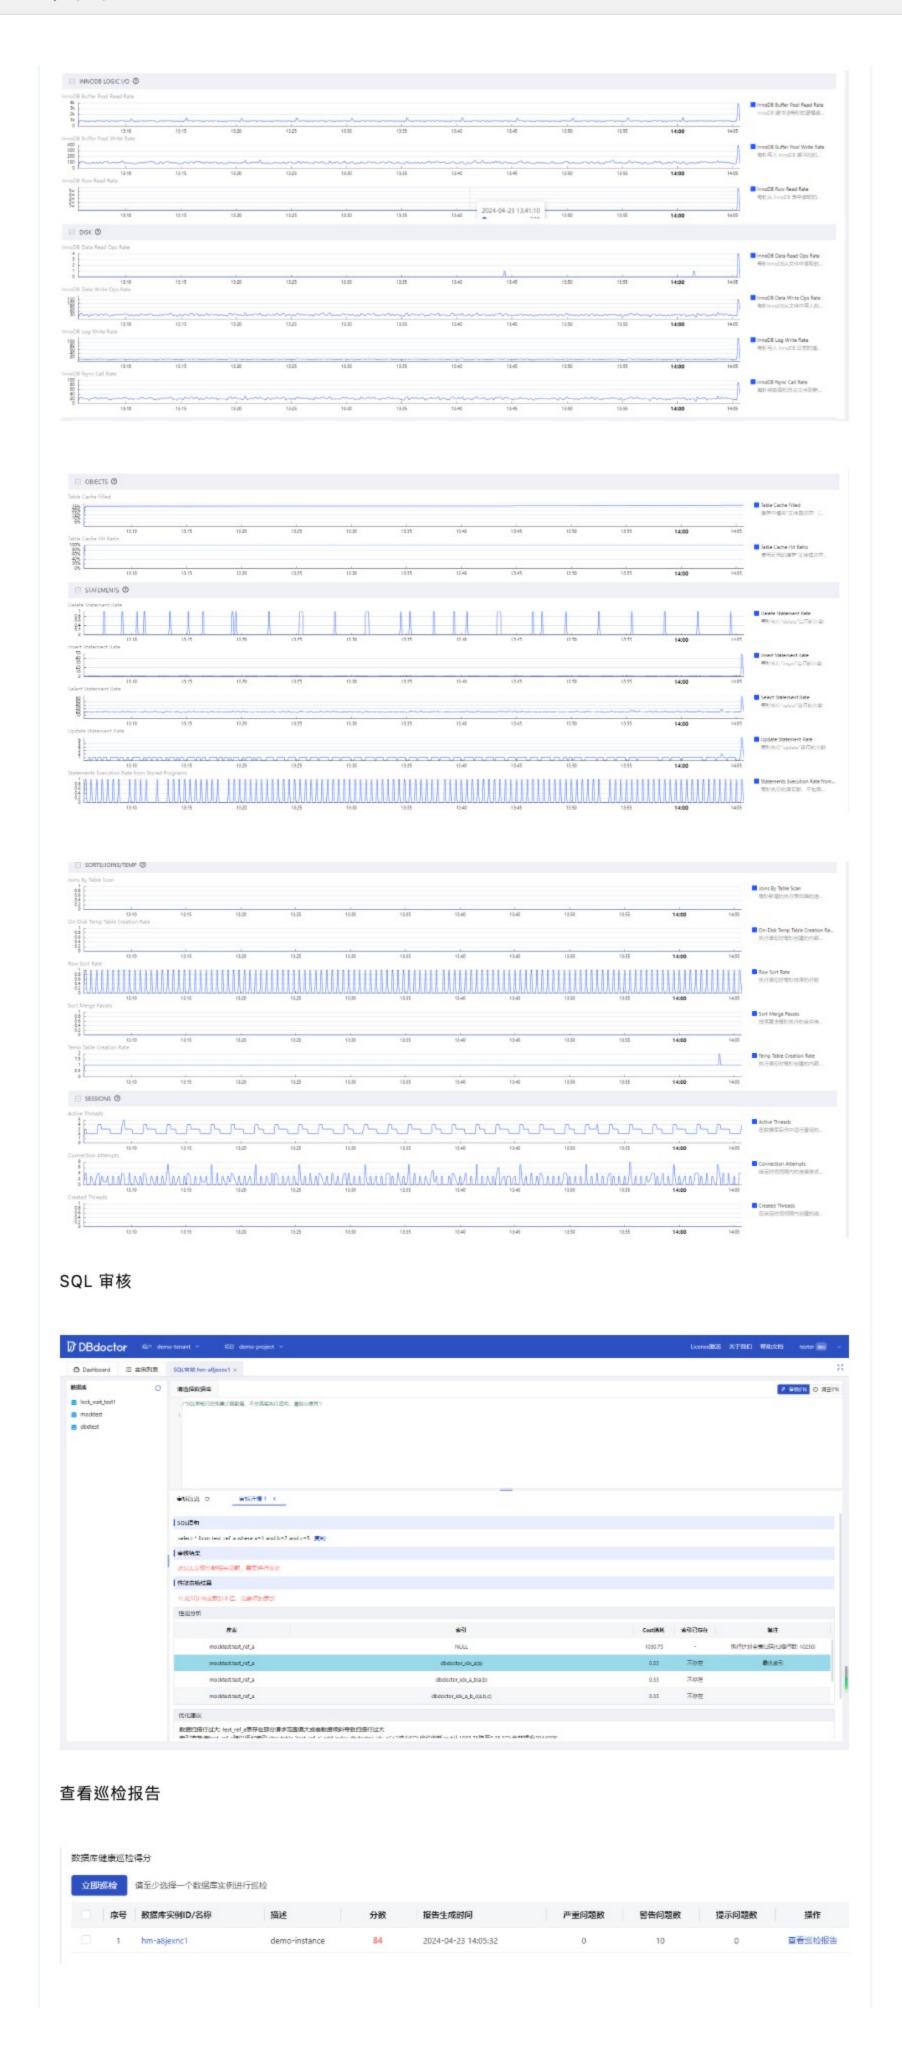

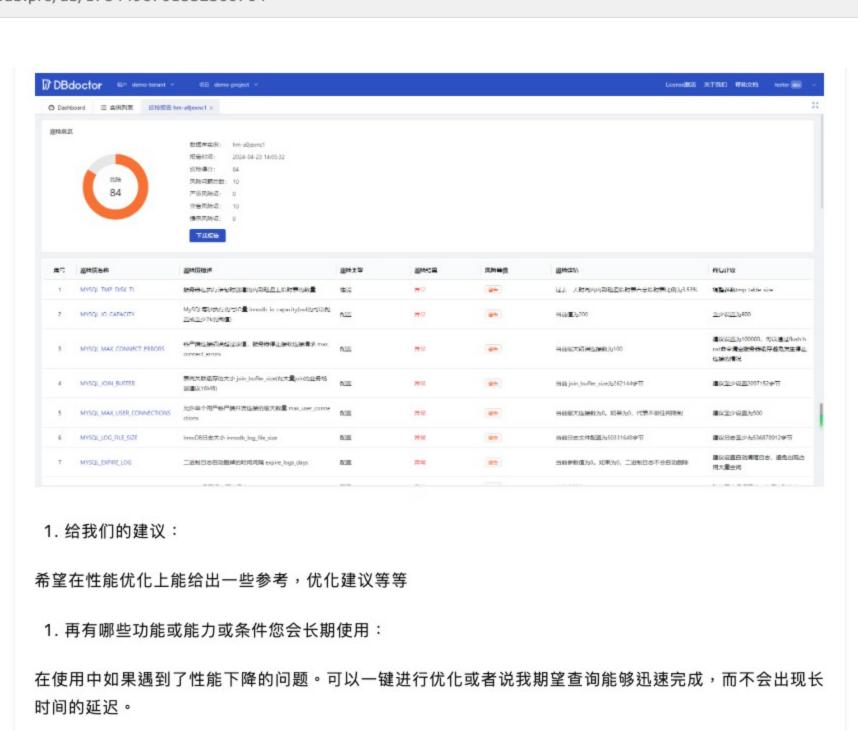

1. 部署到你们公司生产环境需要具备什么条件或者流程:

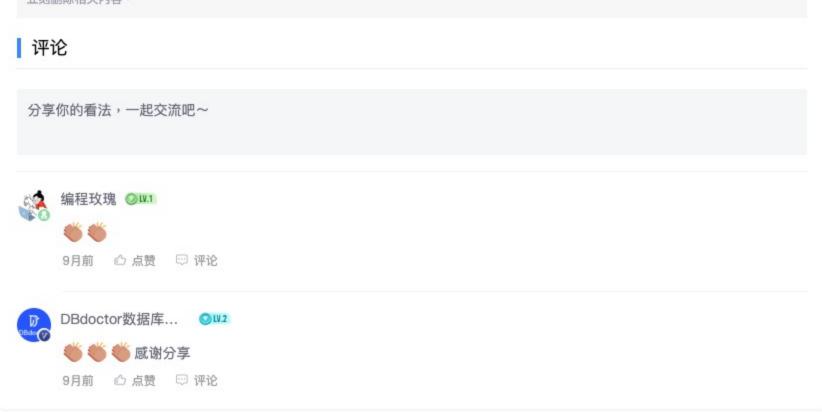

商务对接,POC测试等

四、随意发挥

DBdoctor是一款不错的数据库软件,推荐大家到社区下载体验
